Essentials of Ophthalmology: For Medical School and Beyond is a concise reference text for the medical undergraduates and residents, but the contents will also benefit family physicians who really are the first line of eye-care givers in the community. Highly illustrated with 200 colour clinical pictures and illustrations, the book is written by the multi-disciplinary faculty of the Department of Ophthalmology, National University Health System, Singapore. The authors constantly asked themselves 'how much is too much' and deliberately attempted to weed out any 'excess' for the benefit of the target readers. The content is written in a point format with lucid language. Emphasis has been focused on information that constitutes essential ophthalmic 'core conditions and problems' of the current medical undergraduate curriculum. Every section in the book has 'learning objectives' and a 'take home message' to facilitate quick learning. The book embraces a practical guide to the study of ocular diseases, basic methods of investigations and treatment where applicable.

Skills in Rheumatology

Les maladies systémiques regroupent un cadre hétérogène de maladies (connectivites, vascularites, granulomatoses) dont la pathogénie est caractérisée par une atteinte de plusieurs organes. Bien qu'il s'agisse pour la plupart de maladies orphelines, ces pathologies sont susceptibles d'intéresser tous les médecins du fait de leur polymorphisme clinique. L'atteinte ophthalmologique est fréquente dans bon nombre de ces maladies, principalement en rapport avec une atteinte inflammatoire ou vasculaire. Elle constitue
souvent une clé pour le diagnostic et peut mettre en jeu le pronostic fonctionnel en raison du risque de cécité. La sémiologie oculaire des maladies systémiques et les moyens d’explorations ophtalmologiques sont souvent mal connus des internistes ou des spécialistes d’organes. Inversement, les maladies systémiques sont l’objet de nombreuses interrogations de la part des ophtalmologistes. De ce constat est né Œil et Maladies systémiques qui présente, en 50 chapitres : les principaux syndromes ophtalmologiques et les moyens d’explorations, destinés principalement aux non-ophtalmologistes l’expression ophtalmologique des maladies systémiques (connectivités et vascularités, certaines maladies infectieuses et autres affections multiviscérales) ainsi que les aspects diagnostiques, pronostiques et thérapeutiques. Le professeur Pascal Sève, interniste, et le professeur Laurent Kodjikian, ophtalmologiste, tous deux rattachés à hôpital de la Croix-Rousse à Lyon, ont coordonné l’ouvrage dont les rédacteurs sont issus des diverses spécialités concernées : ophtalmologistes et internistes bien sûr, mais également spécialistes d’organes tels que dermatologues, néphrologues, neurologues, etc., tous référents reconnus dans leur domaine d’expertise. Ce livre apporte des réponses utiles et précises aux praticiens confrontés aux atteintes ophtalmologiques des maladies systémiques. Il intéressera donc les ophtalmologistes, internistes, rhumatologues, neurologues, pneumologues et autres spécialistes d’organes.

Progress in basic and clinical immunology within the last two decades has provided profound insight into the immune system and its role in preventing endogenous and exogenous damage. In contrast, disbalances within this system can result in autoimmune disorders which may affect diverse organs and result in distinct clinical pictures. In many of these, however, the individual etiopathogenetic mechanisms are poorly understood and even more their clinical symptoms are hard to treat. The book offers insight into basic mechanisms of autoimmune disorders. It includes neurological, gastrointestinal, ophthalmological and skin diseases as well as current and future therapeutic options including immunomodulatory drugs and different vaccination strategies. By addressing diverse organ systems, both singular and shared features are elaborated. Thus an exchange of ideas is intended across research on single organ systems within a truly interdisciplinary setting.
